# Prototype Document

**Project Name:** WaveStyled

**Team Name:** Wave INC: Matthew Daxner, Sanjay Shrikanth , Griffen Shu, Arka Pal, Dhatchi Govindarajan

**Release Date:** 6/1/2022

## Functions Not Working Correctly:

**Known Bugs:**

- After swiping four to five outfits in the Recommend & Calibrate pages, there is a brief jitter switch of the outfits being displayed on the current card
    - Does **not** cause program failure
    - Bug locations:
        - FitScreen.js & CalibrateSwipe.js
    - Actions to fix:
        - Load and create the render *Card* objects for the outfits earlier so the transition to the next batch is smoother

**Incompleted User Story:**

- A user cannot have multiple wardrobes and recommendation models associated with their account with the current product prototype
    - No failure incurred, as there is no option to access this feature
